nora nTx

THE REVOLUTIONARY
FAST INSTALLATION SYSTEM
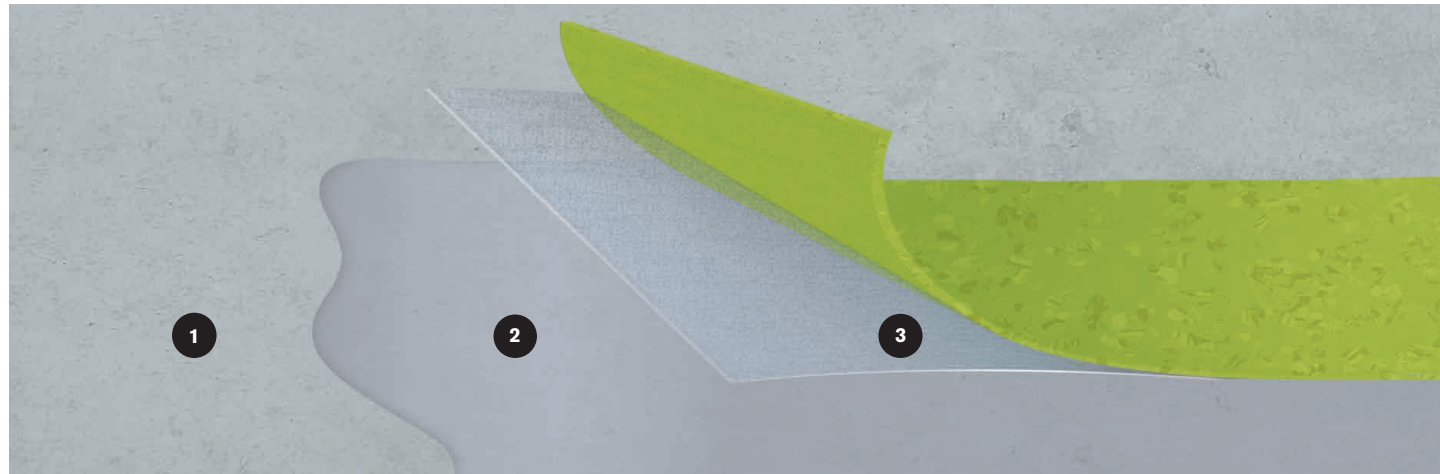

nora®
by **Interface®**

What is nora nTx?

nora® nTx™ is a unique technology for professional installation of nora rubber floor coverings. Ingeniously simple - nora nTx floor coverings brings adhesive strength along from the factory.

The flooring is cleanly and safely installed in a few steps then immediately ready for use. Install over concrete or cement substrates typical in new construction or over existing floor coverings during renovations. Even high residual moisture in the subfloor is no problem for nora nTx.

nora nTx | the system configuration

1 substrate   **2** nora® nTx™ 020 (bond enhancer)   **3** nora® nTx floor covering with self-adhesive back

nora nTx includes a range of noraplan® and norament® standard floor coverings that come equipped with a self-adhesive layer. The glue in the adhesive layer is protected with film until installation and— like our floor coverings—is rubber-based and particulary health-friendly. Specially developed installation materials and tools for nora nTx provide functional safety and ensure the highest quality standards.
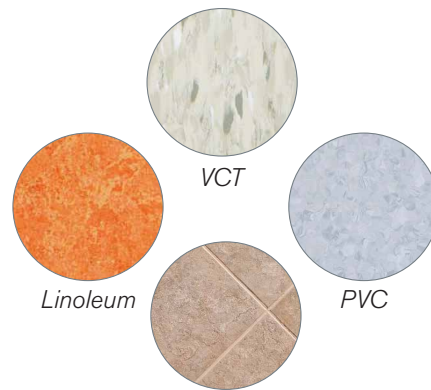

Install nora® nTx on any of these surfaces:

New Construction

Concrete subfloor or leveling compounds

Renovation

VCT

Linoleum

Ceramic

PVC

Existing flooring

Exceeding Moisture Limits

No RH testing necessary

Advantages at a glance

*With nora nTx you can **reduce installation time by up to 50%** and can even **carry out renovations during ongoing operations.***

Installation problems belong to the past.

Reliable installation result

nora nTx reduces installation problems: and is backed by our 10-year bond warranty*.

Immediate usability

Avoid drying and waiting times. Installation is possible during ongoing operations, and the floor can be used immediately after installation.
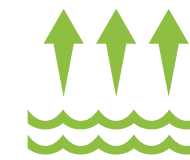

High efficiency

The preparation of the floor and the installation of nora nTx require only a few work steps— for more space in less time.

For all types of subfloors

nora nTx is suitable for all common types of substrates—ideal also for problematic substrates and underfloor heating.

Use with residual moisture

Application in new builds also possible with increased residual moisture in the substrate.

Covering-over-covering installation

In the case of renovations, installation is possible directly over existing floor coverings in just a few steps.

Installing with nora nTx

This "covering over covering" installation example of noraplan nTx updated the Meyer + Harre Interior Design office in Berlin, Germany in a few steps—and was ready for work the next day.

9:00 a.m.: Before the installation
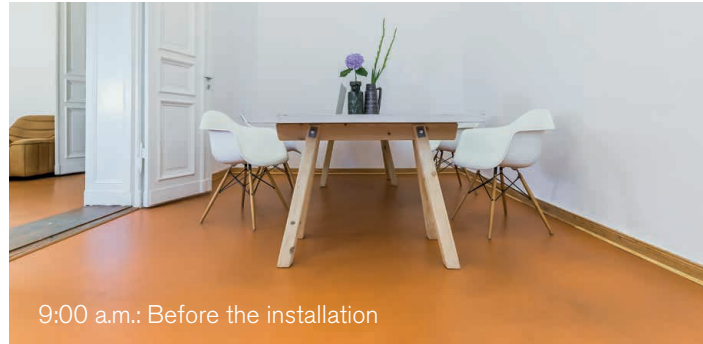

Prepare the subfloor: sand, vacuum, and apply the nora nTx 020 primer.

Roll out the flooring and cut to fit.

Remove protective film and secure the floor covering.

Roll and perform maintenance. The floor can be used immediately - without waiting.

4:00 p.m.: Finished

All information and additional examples featuring the nora nTx installation system can be found at www.nora.com

Technical service

Our expert technical team is available to answer any questions about the installation of nora nTx – here to support and guide you through the entire process. For certain projects, a technician will work on-site with you to ensure successful installation. Contact us at 800-332-NORA.

Renowned nora quality

nora supplies a ten year bond warranty on your purchase of nora flooring with nora nTx, so you can feel safe in your choice to use nora.

GREENGUARD Gold certified for low emissions

GREENGUARD Gold, which offers strict certification criteria in compliance with CA 01350, considers safety factors to account for sensitive individuals (such as children and the elderly), and ensures that a product is acceptable for use in environments such as schools and healthcare facilities.

nora nTx installation is easy and fast
Roll out floor covering and cut to fit, remove protective film and adhere, then secure with a weighted roller - finished.

Compared to conventional wet bonding, it is possible to **avoid work steps and error sources** *like the application of the adhesive and* **eliminate drying and waiting times.**
