

nora **dryfix ed**

THE QUICK INSTALLATION
SOLUTION FOR ESD AREAS

nora[®]
by **Interface**[®]

What is nora dryfix™ ed?

nora dryfix ed is a double-sided conductive dry adhesive tape for the installation of electrostatically dissipative (ESD) and conductive nora® floor coverings. The installation with nora dryfix ed is easy and requires only a few steps for faster turnover of a space. This innovative solution reduces drying and waiting times, because the flooring can be used immediately after the installation.

For new buildings, nora dryfix ed is suitable for all common types of substrates. In case of renovations, the installation is possible directly over existing floor coverings.

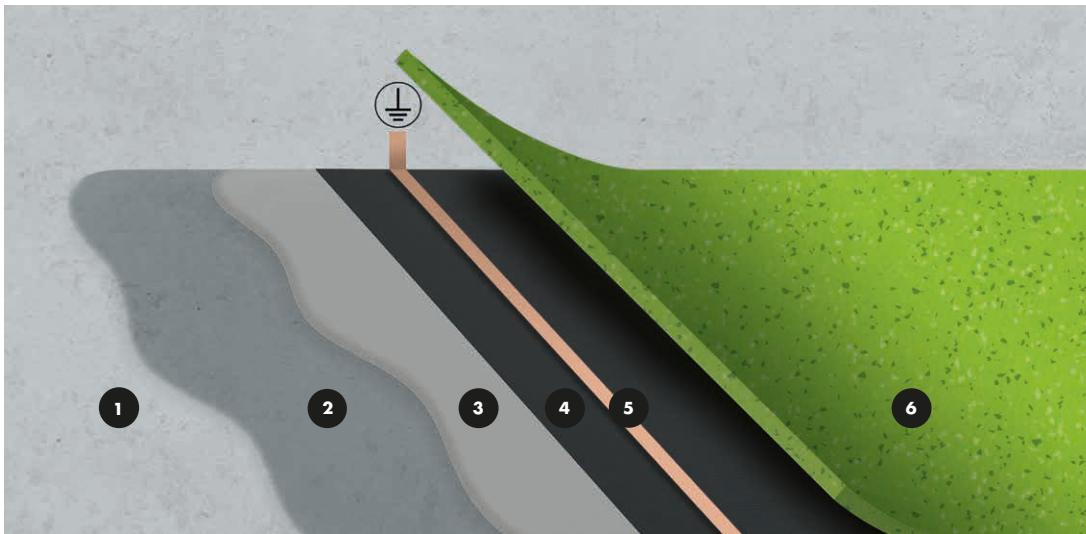

nora dryfix ed is reliable in areas with the highest requirements such as production areas or operating rooms where heavy loads are moved. When installed with nora ed floor coverings, it provides optimum ESD protection of electronic devices and equipment and protects against electrical shock.

Benefits:

- Quick and easy installation
- Less downtime with immediate trafficking after installation
- Reliable installation result
- Suitable for all common substrates
- Possible to install over existing floor coverings
- 10-year warranty on conductive properties
- GREENGUARD Gold certified for low VOC emissions.

nora dryfix ed | the system configuration

1 Substrate 2 Primer (where needed) 3 Leveler (where needed) 4 nora dryfix ed 5 Copper strip 6 nora ed floor covering

Quick installation in a few steps:

1) Lay nora dryfix ed on the subfloor

2) Bond the copper strip

3) Install the floor covering

4) Weld the floor covering (where needed)
