

## nora pro clean<sup>®</sup> system

### A SCRUBBER, NORA<sup>®</sup> PADS AND WATER IS ALL YOU NEED.

The nora pro clean<sup>®</sup> system eliminates the need to use harsh, unfriendly cleaning detergents on your nora<sup>®</sup> premium rubber flooring. The combination of nora's unique, dense, non-porous and dirt-repellent surface, water and our exclusive nora<sup>®</sup> Pads provides a more cost-effective and sustainable cleaning solution. The continuous use of this system will make your nora flooring more resistant to scuffs and staining over time.

The key to the nora pro clean system is the nora Pads. For use only on select nora rubber flooring, these

exclusive pads are designed for all levels of maintenance needs, from the periodic cleaning of small spaces to the more intense post - construction cleaning and restoration.

nora Pads will take you from post-installation maintenance, enhanced shine, daily maintenance, and periodic maintenance through your toughest cleaning challenges. Please contact the nora<sup>®</sup> Maintenance Department for instructions, including product suitability and usage.
