# **B**uilding **I**nformation **M**odeling – Our nora® services for you

The increasing relevance of BIM for our customers also requires us as a flooring manufacturer to react in line with the market. By providing data for our floor coverings and stairtreads, we offer you the opportunity to integrate nora® products into your BIM planning at an early stage. We always provide you with the latest textures and product information for our standard range and thus provide the input for your planning.

Revit

- Files for all current standard floor coverings
- Manual (Readme)

Download at **bim.nora.com**

ArchiCAD

- Files for all current standard floor coverings for ArchiCAD 17+
- Exclusively available from nora systems: Files for all norament® stairtreads of the current standard portfolio as pre-modelled components for ArchiCAD 21+
- Video „nora® stairtreads in ArchiCAD 21+" on how the ArchiCAD stairtool works with the pre-modelled components of the norament® stairtreads
- Manual (Readme)

Download* at **bim.nora.com**

Information

If you have any questions about Building Information Modeling and our BIM files, we will be happy to advise you. For this purpose, please get in touch with your nora® contact person or contact us at info@nora.com .

* The library part contains the files for the floor coverings as well as for the stairtreads and can only be downloaded in its entirety.
